

# CLASSROOM SETS

As a flagship of our company, we offer unique classroom sets containing 15 hand specimens (approximately 1½ × 1½ in. size), and 15 corresponding thinsections. Each rock set includes 15 high quality, standard 27 × 46 mm thinsections (~30 µm) of common igneous, sedimentary, and metamorphic rocks, protected with cover slips. The ore mineral set includes 15 polished thinsections for use with metallurgical microscopes. Each slide is beautifully labeled and designed to withstand many years of rough handling.

## IGNEOUS ROCK COLLECTION

**\$200**

## SEDIMENTARY ROCK COLLECTION

**\$200**

## METAMORPHIC ROCK COLLECTION

**\$200**
